Art. No.: 541360

Triple Bird House Highrise  
Art. No.: 541391

Triple Bird House Raw  
Art. No.: 541390

Vor Natur Redekasse linie har alle de kvaliteter og størrelser som dækker vore mest almindelige fuglearter. Med kobber hulskiven kan du ændre hulstørrelse, med vore triple huse kan du appellere til de fugle der gerne bor i kolonier! Alle vore redkasser er lavet i egetræ og skruet sammen!

Please study our Nature Bird Houses made from oak and with sides of oak bark.

This is a Scandinavian wild bird design which “disappear” in the nature because of the nature look!

Our triple variant are for the birds which like to live in colonies these triple house can be delivered with 2 hole sizes . Big holes 48 mm for starlings etc. and small holes 32-34 mm for sparrows etc.

All “apartments” can be open separate for cleaning!

Our 3 models of single bird houses can also be cleaned by removing the front panel , in that case the nest also can be used for flycatcher and pied wagtail!

See small picture, available for art. 541360 and 541365
